A woman with blonde hair, wearing a white tank top and purple and white striped shorts, is sitting on a bed. She is holding a large, white, fluffy pillow behind her head with both hands. The background is bright and slightly blurred, suggesting a window or a bright room. The overall mood is clean and fresh.

A clear YES to down and feathers

IMPORTANT FOR ALLERGY AND ASTHMA SUFFERERS

RINGSTED DUN

A clear YES to down and feathers

With much publicity and education, it is becoming a well-known fact that allergy and asthma sufferers no longer have to deprive themselves of the luxury and comfort of feather and down filled products. Chances are that you are not allergic to the feather and down itself, but you probably suffer from an allergy to the natural oils and bacterial components commonly found in these fills that have not been

People who have allergy and asthma can safely use genuine down duvets.

cleansed properly. Perhaps you may even suffer from some of the chemicals commonly used in efforts to eradicate this problem.

Although Ringsted Dun's unique washing/sterilization process warrants a top hygienic fill, we repeat

the same process several times so that all bacterial components are eliminated. The result of these efforts ensures a top-hygienic product guaranteed safe for people suffering from allergies and asthma associated with, but not limited to:

- Dust mites
- Odours
- Pesticides
- Nickel
- Formaldehyde
- Chlorinated phenols
- Phthalates in baby articles
- Chloro-organic carriers
- Carcinogenic and allergy-inducing dyestuffs

You can rest assured.

Only the highest of standards are practiced by our manufacturing facility in Denmark.

NOMITE

PAS 1008

suitable for persons suffering from house dust allergy

Ensuring Product Confidence

Ringsted Dun was one of the first duvet manufacturers in the world and the first in Denmark to have been granted the acknowledged Oeko-Tex 1000 certification. Only companies with strict environmental friendly production practices may be considered for this prestigious accreditation. Today, all our products carry the sought after Oeko-Tex 100 certification, which indicates that Ringsted Dun products and practices are continuously and strictly monitored by the Danish Technological Institute. Thus ensuring that our down duvets and pillows are of the highest quality with regard to health. This includes Oeko-Tex 100 standard 'Class 1', which means that they are approved for direct contact with the delicate skin of babies.

Since 1994, our cover fabrics and fills have thus lived up to the highest standards in the market with regard to cleanliness and environmentally correct production practices. This is why Ringsted Dun is always a 100% natural choice.

All our bedding products are NOMITE branded. The NOMITE label is your guarantee that house dust mites cannot penetrate the fabric of the product. So people suffering from the dust mite allergy may fully enjoy the warmth and comfort of all our down and feather filled products.

Downafresh

Hygiene according to DIN EN 12935

The Downafresh® label is a special labeling system developed for European manufacturers of down and feather filled products. It also guarantees a clean product of a very high quality. To be more specific, filling must come from a Downafresh® European manufacturer. The raw feathers are cleaned with water, and the drying process takes place at a temperature above 100° C. The cleaned feathers and down live up to the demands for cleanliness and hygiene specified in the European standard EN12935.

Ringsted Dun uses Downafresh® labeling, which obliges us to order an independent test at least twice a year, documenting that the demands specified in the procedure for Downafresh® are met.
